

QUICKSILVER SCIENTIFIC LIPOSOMAL GLUTATHIONE WITH PHOSPHATIDILCHOLINE

- Glutathione is a tri-peptide produced by liver and consists of glutamic acid, cysteine and glycine. Glutathione is a powerful antioxidant. It has an important role in the regeneration of vitamins C and E in the body, cell proliferation and regulation of apoptosis.
 - Numerous oral glutathione supplements degrade in the stomach before they can reach the cells. Quicksilver Liposomal Glutathione employs an effective phospholipid delivery system to deliver core ingredients more quickly and efficiently. This product contains no gluten and uses phosphatidylcholine derived from purified sunflower seed lecithin. Phosphatidylcholine is important for cell signaling throughout the body and has an important role in fat metabolism.
-
- Helps in regeneration of cells.
 - Improves energy metabolism.
 - Improves liver function.
 - Supports liver detoxification processes.
 - Contributes to the normal functioning of immune cells.
 - It cleans the toxic substances in intestine before they enter bloodstream.

Take 2 pumps twice daily. Hold in mouth 30 seconds before swallowing.
